SAP MDM100 - Master Data Management
SAP MDM101 - MDM GDS
SAP MDM300 - MDM Print Publishing
SAP MDM400 - MDM Data Modeling

SAP Business Suite Definition:

SAP Business Suite is a collection of various SAP enterprise software that ensure optimized execution of business strategies. It consists of the following **SAP Systems:**

1. SAP Customer Relationship Management (SAP CRM)
2. SAP Enterprise Resource Planning (SAP ERP)
3. SAP Product Lifecycle Management (SAP PLM)
4. SAP Supply Chain Management (SAP SCM)
5. SAP Supplier Relationship Management (SAP SRM).

SAP CRM (Customer Relationship Management)

SAP CRM supports all customer related processes and activities like sales and services. It enables the collaboration between the in-house employees, field employees, partners and customers. SAP CRM supports various types of interaction channels like internet, Mobile Phones etc to communicate with customers directly.

SAP ERP (Enterprise Resource and Planning)

The application lets your people work more quickly and cost-effectively – connecting them directly to business processes and delivering the information and capabilities they need to make decisions and take action. It also enables you to innovate and adapt to the changing requirements of your industry – at lower cost and with greater speed.

SAP ERP- SEM (Strategic Enterprise Management Software) ::*SAP Strategic Enterprise Management (SAP SEM) delivers end-to-end ERP software capabilities to support the entire performance management life cycle, including Consolidated Financial Reporting, Planning, budgeting & forecasting, Corporate performance management and scorecards & Risk Management*

SUB Modules:

SEM-BCS - Business Consolidation
SEM-BIC - Business Information Collection
BW-BPS - Business Planning and Simulation
SEM-CPM - Corporate Performance Monitor
SEM-SRM - Stakeholder Relationship Management

SAP PLM (Product Life Cycle Management) :

- Product Lifecycle Management is a collection of solutions that can be used to digitally create and maintain product information to be made available to the entire organization at any point of time.
- It provides all needed information about the complete product and asset life cycle through the extended supply chain, thereby ensuring legal compliance.

SUB Modules

SAP PLM_RM - Recipe Management
SAP PLM_AM - Audit Management
SAP PLM400 - Quality Management
SAP PLM410 - Quality Notifications
SAP PLM405 - Quality Inspections
SAP PLM425 - QM in Sales and Distribution

SAP SCM (SAP Supply Chain Management)

SAP Supply Chain Management (SAP SCM) enables collaboration, planning, execution, and coordination of the entire supply network, empowering you to adapt your supply chain processes to an ever-changing competitive environment.
SAP – APO - SAP Advance Planning and Optimization

SAP – OCH - SAP Inventory Collaboration Hub
SAP – EM - SAP Event Management

SAP SRM (Supply Relationship Management)::
Supplier Relationship Management (SRM) enables the full range of supply and procurement activities from the strategy stage to execution

Functional Modules

SAP FI - Financial Accounting::
Designed for automated management and external reporting of General Ledger (GL), Accounts Receivable (AR), Accounts Payable (AP), and Asset Management (AM) with a user-defined chart of accounts.
External reporting, such as income statement and balance sheet
Represents cost and revenue flows throughout the organization
Aids in organizational decision making
Supports internal reporting such as cost centre reports

SUB Modules
SAP FI-GL - General Ledger
SAP FI-AP - Accounts Payable
SAP FI-AR - Account Receivable
SAP FI-SL- Special Purpose Ledger
SAP FI-BL – Bank Accounting
SAP AA - Asset Accounting: *AA provides tools to acquire, depreciate, evaluate, and retire assets. The kinds of assets covered are fixed, low value, leased, and real estate.*
Low value assets depreciate in the year they are bought and are often aggregated as a single asset master record.
Depreciation often needs to be tracked (for more than one reason), so SAP R/3allows you to depreciate the same piece of equipment in several parallel ways.

SAP CO – Controlling :: *SAP CO Module helps management by providing reports on cost centers, profit centers, contribution margins, profitability, etc. They also deal with cost accounting processing, analytical reporting, and audit-controlling spectrums.*
SUB Modules
SAP CO-CEA - Cost Element Accounting
SAP CO-CCA - Cost Center Accounting
SAP CO- Internal Orders
SAP CO- Activity-Based Costing
SAP CO-PC- Product Cost Controlling
SAP CO-PA- Profitability Analysis
SAP CO-PCA- Profit Center Accounting
SAP CO-OM- Overhead Cost controlling
SAP CO-ML- Material Ledger

SAP TR – Treasury
SUB Modules
SAP TR-CB - Cash Budget Management
SAP TR-MRM - Market Risk Management
SAP TR-CM - Cash Management
SAP TR-LO - Loans Management
SAP TR-TM - Treasury Management
SAP TR-FM - Funds Management

SAP IM - capital Investment Management :: It used for planning, budgeting and monitoring of a comprehensive budget .An investment program represents the planned or budgeted costs for the capital investments of an enterprise. Using investment programs, you can obtain an overview of planning and budgeting processes in complex enterprise structures for all investments and large projects of the group, while at the same time maintaining strict budgetary control.

Human resource management Module
Human Resources - HR

SAP HCM(Human Capital Management) Or SAP HR - Human Resource:: *Takes care of payroll, time recording, applicant administration, and organization data. It supports the planning and control of personnel activities. It consists of all master data, system configuration, and transactions to complete the Hire to Retire (or, as some say, Fire) process.*

SUB Modules
Organizational Management (OM)
Personnel Administration (PA)
SAP PA - Personnel Administration
SAP PA-APP - Applicant Management
SAP PA-BEN - Benefits
SAP PA-EMP - Employee Management
SAP PA-INW - Incentive wages
SAP PA-PAY - Payroll
SAP PA-TIM - Time Management
SAP PA-TRV - Travel Expenses
Personnel planning and Development(PD)
SAP PD-OM - Organizational Management
SAP PD-RPL - Room Reservations Planning
SAP PD-WFP - Workforce Planning
SAP PD-SCM - Seminar and Convention Management
SAP PD-PD - Personnel development
Recruitment
Time Management (TM)
Travel Management (TM)
Payroll
Benefits
Compensation Management
Personal cost Planning
Budget Management
Training and Event Management

Logistic and Manufacturing - Mainly SD/MM

SAP SD - Sales & Distribution:: *This module includes the business processes used to sell and deliver products and services to customers and business partners. Information about the product and customers (both of which are stored in the master data) is used in SD.*

SUB Modules
SAP SD-MD - Master Data
SAP SD-CAS - Sales Support
SAP SD-SLS - Sales
SAP SD-SHP - Shipping
SAP SD-TR - Transportation
SAP SD-BIL - Billing
SAP SD-SIS - Sales Information System
SAP SD-EDI - Electronic Data Interchange (EDI)
SAP SD-GF General Sales Functions
SAP LE - Logistic Execution

SAP MM - Material Management:: *The grouping of management functions supporting the complete cycle of material flow, from the purchase and internal control of production materials to the planning and control of work in process to the warehousing, shipping, and distribution of the finished product.*
SUB Modules
SAP MM-PUR - Purchasing
SAP MM-IM - Inventory Management
SAP MM-WM - Warehouse Management
SAP MM-IV - Invoice Verification
SAP MM-IS - Information System
SAP MM-CBP - Consumption Based Planning
SAP MM-EDI - Electronic Data Interchange
SAP MRP - Materials Requirement Planning
SAP ML - Material Ledger

SAP PP - Production Planning :: *This module supports functions for the overall level of manufacturing output and other activities to best satisfy the current planned levels of sales (sales plan or forecasts), while meeting general business objectives of profitability, competitive customer lead times as expressed in the overall business plan. One of its primary purposes is to establish production rates that will achieve management's objective of satisfying customer demand, by maintaining, raising or lowering inventories or backlogs, while usually attempting to keep the workforce relatively stable.*

Sub Modules
SAP PP-SOP - Sales and Operations Planning
SAP PP-CRP - Capacity Requirement Planning
SAP PP-MP - Master planning
SAP PP-ATO - Assembly orders
SAP PP-BD - Basic Data
SAP PP-IS - Information System
SAP PP-KAB - Kanban/Just-in-Time
SAP PP-MRP - Material Requirements Planning
SAP PP-PDC - Plant Data Collection
SAP PP-PI - Production Planning for Process Industries
SAP PP-REM - Repetitive Manufacturing
SAP PP-SFC - Production orders
SAP DS - Detailed Scheduling

SAP PM - Plant Maintenance:: *Supports the planning, processing, and completion of plant maintenance tasks. Allows for planners to schedule routine maintenance in a way that is least disruptive for manufacturing and sales requirement.*

SUB Modules
SAP PM-EQM - Equipment and Technical Objects
SAP PM-IS - PM Information System
SAP PM-PRM - Preventive Maintenance
SAP PM-PRO - Maintenance Projects
SAP PM-SM - Service Management
SAP PM-WOC - Maintenance Orders Management

SAP QM - Quality Management:: *Supports the quality inspection aspects of the business, including purchasing, research, and sales. Allows for buyers and manufacturing personnel to track inspection lots and test results*

SUB Modules
SAP QM-QP - Quality Planning
SAP QM-IM - Quality Inspection processing
SAP QM-QC-AQC - Quality control
SAP QM-IT - Test equipment management
SAP QM-QN - Quality notifications
SAP QM-CA - Quality certificates
SAP QM-CR - General functions
SAP QM-PT-RP - Control in logistics

SAP PS - Project System :: *Helps you to plan, manage, control, and figure the cost of R&D projects, and soon. The common tasks revolve around allocation of people, resources, and money within the framework of schedule and task relationships.*

SUB Modules
SAP PS-CAF - Payments
SAP PS-CON - Confirmation
SAP PS-COS - Costs
SAP PS-CRP - Resources
SAP PS-DAT - Dates
SAP PS-DOC - Documents
SAP PS-IS - Information System
SAP PS-MAT - Material
SAP PS-PRG - Progress
SAP PS-REV - Revenues and Earnings
SAP PS-SIM - Simulation
SAP PS-ST - Structures

SAP PS-VER - Versions

SAP LO - General Logistics ::
SUB Modules
SAP LO-AB-TC - Trading Contract
SAP LO-BM - Batches
SAP LO-ECH - Engineering Change Management
SAP LO-EHS - Environment Management
SAP LO-EWB - Engineering Workbench
SAP LO-HU - Handling Unit Management
SAP LO-LIS - Logistics Information System
SAP LO-MAP - Merchandise & Assortment Planning
SAP LO-MD - Logistics Basic Data
SAP LO-MDS - Merchandise Distribution
SAP LO-PDM - Product Data Management
SAP LO-PR - Forecast
SAP LO-RIS - Retail Information System
SAP LO-SCI - Supply Chain Planning Interface
SAP LO-SRS - Retail Store
SAP LO-VC - Variant Configuration
SAP LO170 - Quality Management
SAP LO705 - Quality Inspections
SAP LO710 - Quality Notifications
SAP LO725 - Quality Certificates
SAP LE - Logistic Execution

Cross Application Module

Cross Application (X-Apps)
SAP MII for Manufacturing Integration & Intelligence
SAP APO - Advanced Planner and Optimizer
SAP Live Cache

SAP WF – Workflow:: Links the *integrated SAP R/3 application modules with cross-application technologies, tools, and services, including e-mail.*
Workflow allows you to set up the followings:
Maintain your company's organization structure according to responsibility.
Link the predefined standard tasks with the authorized agents in your company.
Activate existing event receiver links between triggering events and consuming workflow tasks.
Name a technical person responsible for each standard workflow template.

INTERNATIONAL CONCEPT OF WORK FROM HOME
Work from home theory is fast gaining popularity because of the freedom and flexibility that comes with it. Since one is not bound by fixed working hours, they can schedule their work at the time when they feel most productive and convenient to them. Women & Men benefit a lot from this concept of work since they can balance their home and work perfectly. People mostly find that in this situation, their productivity is higher and stress levels lower. Those who like isolation and a tranquil work environment also tend to prefer this way of working. Today, with the kind of communication networks available, millions of people worldwide are considering this option.

Women & Men who want to be independent but cannot afford to leave their responsibilities at home aside will benefit a lot from this concept of work. It makes it easier to maintain a healthy balance between home and work. The family doesn't get neglected and you can get your work done too. You can thus effectively juggle home responsibilities with your career. Working from home is definitely a viable option but it also needs a lot of hard work and discipline. You have to make a time schedule for yourself and stick to it. There will be a time frame of course for any job you take up and you have to fulfill that project within that time frame.

There are many things that can be done working from home. A few of them is listed below that will give you a general idea about the benefits of this concept.

Baby-sitting
This is the most common and highly preferred job that Women & Men like doing. Since in today's competitive world both the parents have to work they need a secure place to leave behind their children who will take care of them and parents can also relax without being worried all the time. In this job you don't require any degree or qualifications. You only have to know how to take care of children. Parents are happy to pay handsome salary and you can also earn a lot without putting too much of an effort.

Nursery
For those who have a garden or an open space at your disposal and are also interested in gardening can go for this method of earning money. If given proper time and efforts nursery business can flourish very well and you will earn handsomely. But just as all jobs establishing it will be a bit difficult but the end results are outstanding.

Freelance
Freelance can be in different wings. Either you can be a freelance reporter or a freelance photographer. You can also do designing or be in the advertising field doing project on your own. Being independent and working independently will depend on your field of work and the availability of its worth in the market. If you like doing jewellery designing you can do that at home totally independently. You can also work on freelancing as a marketing executive working from home. Wanna know more, email us on workfromhome.otr214423@gmail.com and we will send you information on how you can actually work as a marketing freelancer.

Internet related work
This is a very vast field and here sky is the limit. All you need is a computer and Internet facility. Whatever field you are into work at home is perfect match in the software field. You can match your time according to your convenience and complete whatever projects you get. To learn more about how to work from home, contact us today on workfromhome.otr214423@gmail.comand our team will get you started on some excellent work from home projects.

Diet food
Since now a days Women & Men are more conscious of the food that they eat hence they prefer to have homemade low cal food and if you can start supplying low cal food to various offices then it will be a very good source of income and not too much of efforts. You can hire a few ladies who will help you out and this can be a good business.

Thus think over this concept and go ahead.

Manoj Miglani 23 September 2014 at 05:18

Dear All,

Thanks for your valuable comments. I have gone through the entire conversation. I would request you all to answer and help me in guiding about the SAP SD as a career move ahead.

I name is Manoj , I have 10 years of experience in to Sales & Marketing (in FMCG (4 yrs) and Media (5+ years) domain. Two years back i resigned from a big media organization to start my own business as an advertising agency. Satisfaction is missing.In the current scenario, I want to move ahead in life . I am planning to do SAP SD Module from a reputed institute like Atos/ JKtechnosoft/ HCL/ NIIT. What do you all experienced people think.....would this be a right decision at this point of time.....I was at the package of 7 Lacs PA that time....Also let me know ....if i move ahead for this after 3-5 years what annual package i can get.....Please guide me .....

regards,

Manoj

Thanks for Information SAP FICO refers to the Finance (FI) and Controlling (CO) is the Core modules of SAP ERP system.
SAP FI (Financial Accounting) is an important core module in SAP where in live time the financial processing transactions are captured. This is used to create statutory Financials Statements in which data is drawn for external reporting purposes.
SAP CO (Controlling) module is provides operational information to the management of a company to support business analysis and decision-making.SAP FICO Online Training

PMI's Project Management Professional (PMP) ® credential is the most important industry-recognized certification for project managers. Recently I went for a PMP prep course by the training provider mentioned above, the instructor was too good and I passed with relative ease. Looking forwards to apply what I learned in PMP class in my company.
