## Summary

Posted: **Aug 7, 2019**

Weekly Hours: **40**

Role Number: **200087035**

Be ready to make something extraordinary when you come here. Dynamic, inspiring people and innovative, industry-defining technologies are the norm at Apple. The people who work here have reinvented and defined entire industries with our products and services. The same passion for innovation also applies to our business practices—strengthening our commitment to leave the world better than we found it. You should join Apple if you want to help deliver the next amazing Apple product.

To support our strong business growth, Apple is looking for a talented and highly motivated individual with significant information security compliance experience to be part of our IS&T SAP Security Team.

When you join this team, you will use your collaborative talents to enhance the security compliance knowledge and capabilities of the organization. You will have the opportunity to partner with stakeholders to understand specific operational needs while reviewing and recommending scalable security compliance integrations to ensure both sets of needs are fulfilled.

The successful Sr. Security Compliance Analyst will partner with application owners and custodians, facilitate compliant business processes and technical designs, document opportunities for enhancement and ultimately provide recommendations that help ensure Apple's business requirements are enabled through effective security compliance controls. You will help ensure the solutions are globally scalable, adhere to Apple confirmed software development and project management methodologies, and are based on sound security design principles and guidelines.

You have a proven foundation of business process knowledge and related experience working with and ensuring enterprise systems and processes align with compliance frameworks (such as PCI, SOX, GDPR, etc.)

You have hands-on experience with security, compliance, or privacy assessments for enterprise level operating environments. In addition to possession or attainment of one or more industry certifications (e.g. CISA, CIA, PCI-ISA, ISO-27001 Lead Auditor or Implementor). Familiarity with SAP systems is desirable, but not required.

## Key Qualifications

- A creative solution delivery track record that demonstrates an ability to meet complex security requirements on a global scale
- Experience leading teams in a dynamic and collaborative environment while communicating effectively across all organizational levels
- Analytical and problem solving skills at both a “micro” and a “macro” level
- Solid project management and functional lead experience
- Superb communication, interpersonal, and organizational skills
- You have prior work experience with enterprise scale environments
- Certification in one or more security compliance areas
- You have excellent judgment and integrity with the ability to make timely and sound decisions
- At least 5 years hands-on experience with security compliance or privacy assessments
- Ability to stay focused and prioritize a heavy workload while achieving extraordinary quality
- You are upbeat, adaptable, and results oriented with a positive attitude
- You bring passion and dedication to your job and are committed to our vision and supporting our community

## Description

As the Sr. Security Compliance Analyst you will help guide SAP IS&T teams to craft solutions that ensure its designs are aligned with Apple’s overall system application security and compliance standards.

The Sr. Security Compliance Analyst will be responsible for the following:

Support the review of technical designs and change requests across multiple concurrently running projects by understanding planned changes, recommending security compliance improvements and approving designs that enforce to Apple risk principles.

Within assigned areas become the owner / domain expert in SAP compliance. Share related knowledge with a wider IS&T and business audience as needed.

Help formulate and review resources, timelines, and cost estimates used to establish project budgets.

Where and as necessary lead efforts to identify an issue root cause, collect information to gain increased understanding, or drive a “Proof of Concept” prototype initiative.

## Education & Experience

MS/BS in Computer Science, Information Technology, Business or equivalent experience
