AIG's Investment Management organization is a dynamic multi-asset class asset manager with both general account and third party asset management mandates. Our business is informed by cutting-edge methods and technologies, including applied science, AI, and analytics. Our Change Management team provides strategic and tactical project management support capabilities as well as a portfolio management framework across various initiative types, such as revenue, regulatory, technical, optimization, risk, and analytics projects.

Your contributions at AIG

In this newly created role, responsibilities include:

- Build and manage project team/PMO that could include project managers, business analysts, scrum masters, product managers.
- Coach, mentor, and develop project managers and business analysts.
- Establish project management framework, standards, tools, materials, and process.
- Manage strategic, complex programs and initiatives.
- Establish and manage project portfolio-level reporting, governance, and decision-making.
- Manage project-level and portfolio-level plans, risks, resources, project budget & financials.
- Work with senior business leaders to provide thought leadership as well as understand and influence business initiatives and priorities to meet the Investments Group's strategic goals.
- Lead project feasibility and business case development by matching projects to the strategic priorities of the Group and obtaining approval of business cases.

What we are looking for

- Strong track record of large project/program delivery.
- Strong background and work experience in Asset Management. (Understanding of the insurance value chain is a plus).
- Evidence management and leadership success.
- University degree (Business Administration) or equivalent.
- Ability to develop and deliver high quality output against project objectives and meet tight deadlines.
- Ability to develop impactful written presentations and participate effectively in meetings with senior stakeholders.
- Ability to develop strong key stakeholder relationships at all levels.
- Strong interpersonal and excellent communication skills.
- Management consulting experience would be an advantage.
- Strategic and operational transformation experience would be an advantage.
- 10+ years of industry experience.
- 10+ years of strategic project management and business analysis experience in large-scale, global, multidisciplinary, technology driven programs.
- Experience in translating ambiguous project goals / objectives into the presentation of clear deliverables to the business and stakeholders.
- Capable of building strong relationships with internal and external parties alike, with demonstrable influencing and presentation skills at all levels; ability to drive results through accountability.
- Excellent verbal, written, and presentation skills with the ability to interact with effectively with senior-level executives to solve problems and support strategic discussions, ability to influence others, including upper management, staff, and other departments.
- A proactive, self-starter working style and willingness to deep dive into issues where appropriate while maintaining focus on the overall project / program goals and strategic direction.
- Ability to work in multi-function, multi-location cross border teams; flexible and adaptable.
