Business process reengineering

Business Process Outsourcing

The objectives of Business Process Outsourcing though have been constant; the processing has evolved largely over the time. From process improvement, cost

savings, reduced head counts, strengthening global presence, focus on core competencies and business value addition- Business Process Outsourcing is known to act as the catalysts for organizations looking for multi-faceted growth. Known to be a boom in the industry- Business Process Outsourcing requires its own segment of strategic planning and enforcements which is mastered by SACC INC. Our theory of putting forth Business Intelligence (BI) to exceed SLA'a and optimize processes has been acclaimed highly by our clients.

The Dual Shore Model implementation in this league works towards reducing the defects of variable verifications of application functionality. With an increased coverage on process outsourcing by leveraging the time-zone differences- we aim at expanding the working hours; enhancing productivity for our clients. The phases of planning, designing, executing and reporting being set to a well maintained structure- we implement to maximize the output.

Data Warehousing and Business Intelligence

Data Acquisition and Integration, Data Repository, Data Delivery, Analysis, Metadata Management and Cost Reduction being the major keys in the process, we at SACC INC are experienced at using all the Data Warehousing (DW) and Business Intelligence (BI) methodologies to assist our clients draw their requirements from the storehouse in the minimum wasted time and thus add to the productivity of an organization. Our processing in DW and BI are stated for the greater mode of ultimately supporting the Enterprise Planning efforts by an organization. Initiating from the client's architecture- we analyze and decipher the technologies tools and data in their required mode to build up a database with more important and refined information.

Technology Infrastructure Services

SACC INC has been working all these years to create the most beneficial business atmosphere for our clients. We acknowledge the fact that an ERP solution is irrelevant and incomplete without the proper implementation of Technology Infrastructure Services. The aim of the process is to allow clients- the flexibility to arrange the basic infrastructural necessities inclusive of internet service, web presence, network, e-mail environment and management. With the maintenance of the backend databases, mainframe systems and enterprise servers supported by the proper data and operating systems, we ensure the multiple usage of software's by implementing our Software Application Services.

Business & Technology Solutions

Our consulting features for clients in terms of Business & Technology Solutions support the use of the leading softwares in the industry like Microsoft, Microsoft Dynamics, FRx, Citria and the other vendors in the league. The gist of the same is to draw the best possible resourced solution for the operational support for an organization. We analyze our client's business environment and thus adhere to a team depending on the results who consult and conduct the necessary proceedings of leveraging the technology inducted sections. Our understanding of Business Solutions being dedicated and ethical- we work towards providing the best consultation to our clients to increase the operational support.

Staffing Services

Being beamingly strong in this segment of client servicing, SACC INC takes pride in acclaiming the fact that we are the best known organization when it comes to providing Staffing services to our clients. With a huge resource of database- we are dedicated to build on the relations that we lay down amongst our clients and associates. We specialize in laying the perfect platform for uniting opportunities and talent- provisioning the circumference for permanent as well as short term recruitments. A huge listing of clientele with our staffing services have had major share in success with a proven track record over the years supporting the idea of partnering with the right people. With the importance of researching and recruiting senior individuals to the client organizations; our Executive Search is quite renowned within the domain. The requirements being made stable; our focus in this nature of services is definitive keeping the resource and the search criteria as variable.

Outsourcing and Offshoring

The need to Offshore Outsourcing being completely dependant on an organization's requirements- we acknowledge the advantages and the needs of the process as a whole. SACC INC has seen the rise of the industry requirements over the year and therefore has savored the impact and the required resources for the same process. The advantages being highly lucrative- the focus of the process and our method of implementation have been kept simple- cost effectivity, better skillsets, expanding working hours and better focus on the core competencies.

CORE CAPABILITIES

▸ Business Process Analysis
▸ Project and Program management
▸ Application Analysis & Selection
▸ Software Design, Development and testing
▸ Enterprise Software Implementation
▸ Network and Storage Architecture
▸ Technical Support and Maintenance

SACC is a fully-owned subsidiary of Alten Calsoft Labs Inc that was incorporated in 1998. Since its inception, we have set the bar high by offering focused resourcing services with an in-depth understanding of the market, skills required, technologies, rates, and understanding of our client's business.

Our specialist knowledge, an extensive candidate database, partnerships and a consultative approach to finding the best solutions for clients by closely listening to them- sets us apart from competition while helping us grow consistently.

We are an agile company that helps its clients succeed by providing high caliber resources; provide rapid response to requirements and performs flawless execution.

We offer a variety of services and quality of performance that match or exceed larger competitors'; yet providing the most personal, responsive and flexible service that typically characterizes a smaller 'Boutique' firm.

Philosophy

At SACC INC, we formulate effective strategies for improvement of business processes by addition of appropriate technological changes and methodologies that streamline the supply chain. We are dedicated to bringing value to our clients by offering end-to-end solutions across diverse technology platforms and industry domains. The services are on-site as well as through a global delivery model, which delivers 24x7 coverage. We contribute to our client's success by engaging the right professionals on both contract and permanent structure.

Furthermore, we are committed to providing our services in a cost effective, efficient and innovative resourcing solutions tailored to our client's specific needs.

Values

Our key values are honesty and respect for ethics while keeping the engagements open and straightforward. Introspection and continuous improvement is in firms' culture and all these have consistently ensured that we remain committed to delivering exceptional service and resources to our clients. A liberal prospective to the technological advancements and requirements on the other end has helped maintain the balance in our work culture.
